

Position: Medical Director, Patient Analytics

Location: Wayne, PA, Boston, MA or New York, NY

Company Description:

HVH Precision Analytics leverages the power of sophisticated analytics, the breadth of healthcare big data and our deep therapeutic-area expertise to provide a unique and unmatched suite of services to the pharmaceutical and healthcare industries. Our proprietary ability to collect, aggregate, and analyze the journeys of known patients to inform the early diagnosis of undiagnosed patients is revolutionary in the healthcare market, and helps our clients maximize their ability to find and engage patients.

HVH was built out of a unique partnership between Perspecta (formerly Vencore and Lockheed Martin), a proven provider of information solutions in the defense-grade analytics space for the Department of Defense and Intelligence Communities, and Havas Health & You (part of Havas Group), a global strategic communications partner to many top biopharma companies.

We utilize the most comprehensive medical claims, healthcare records and consumer data sets available and tailor a blend of cutting-edge algorithms, analytic techniques, and machine learning to paint an accurate picture of patient journeys and populations. HVH's solutions help our clients gain insights not previously possible; we are connecting patients to therapy sooner and positively impacting lives.

Our health analytic service offerings include:

- Undiagnosed Patient Discovery
- Patient Journey Analysis
- Clinical Trial Analysis
- Therapeutic Market Sizing
- Analytics for Health Communication Optimization
- Health Economics and Outcomes Research

Position Description:

We are growing rapidly as an organization, and are expanding our Clinical Affairs team. This position will report to the Chief Medical Officer. We are seeking a physician who has demonstrated an ability to excel academically and balance many responsibilities. Qualified candidates will demonstrate excellent communication capabilities, a strong work ethic, commitment, and willingness to learn new skills. This physician must bring broad medical knowledge to any dialogue – from collaboration with our internal data science team to external key opinion leaders. This person would be involved in every phase of work we do: assessing the feasibility of incoming projects, working with clients to understand their critical

business question, designing the analytic strategy in conjunction with the data science team, developing proposals, and ultimately executing and delivering the program. Finally, this person would aid in writing, editing, publishing, and presenting the work in academic and industry settings.

Required Experience/Skills:

- Medical Doctor (M.D.) from an accredited institution (not optional)
- 3-5 years of experience in clinical practice
- Excellent communication skills, both verbal and written
- Outstanding interpersonal skills
- Travel required, approximately 30-40%
- Ideally the candidate would also bring experience in the pharmaceutical industry/clinical research organizations/payers/analytics

Responsibilities:

- Drive medical analytic activities with stakeholders (i.e. commercial, analytics, business development)
- Guide HVH team in understanding the disease state/client challenge; design strategy to address client needs
- Work on complex problems in which analysis of situation or data requires an in-depth evaluation of various complex factors
- Keep abreast of medical information and technology through conferences and medical literature and acts as a therapeutic area resource
- Collaborate with, support, and exchange information with Key Opinion Leaders, health care professionals, professional organizations, and disease state advocacy groups
- Represent HVH Precision Analytics at conferences, client meetings, and in interactions with thought leaders
- Support the build-up of HVH Precision Analytics reputation as a science-based, patient focused reliable partner
- Exemplify medical professionalism, scientific rigor, excellence in all activities
